PROJECTS

Inventory Management [🔗](#) | [Html,Css,Javascript](#)

2024

- Developed an Inventory Management System utilizing Express.js, implementing the MVC architecture to efficiently handle product entry, updates, and deletions.
- Created a responsive user interface using HTML, CSS, and JavaScript, ensuring smooth and efficient inventory tracking and management.
- Designed a user-friendly platform enabling real-time inventory tracking, streamlining and optimizing the management process.

Snake Game Play [🔗](#) | [Html,Css,Javascript](#)

2024

- Built an interactive website featuring engaging snake game based on JavaScript—with features that are used for smooth and great user experience which feels like the old snake games.
- Utilized vanilla JavaScript, HTML, and CSS to craft dynamic, responsive game interfaces, focusing on interactive gameplay mechanics and optimized performance across devices.
- Structured modular, maintainable codebases to enhance scalability, allowing seamless addition of new games and features in the future.

CaarSeva [🔗](#) | [Html,Css,Javascript](#)

2023

- The web application enables car owners to browse through a curated collection of featured branded cars.
- It facilitates essential services including car rental, oil and battery changes, ensuring convenience for users.
- Implemented with HTML, CSS, and JavaScript, the platform guarantees 24/7 support and a seamless user experience.

TECHNICAL SKILLS

Languages: Java, Javascript

Technologies/Frameworks: HTML5, CSS3, React

Developer Tools: VS Code, Eclipse
